

Ideation Phase Brainstorm & Idea Prioritization

Date	27 October 2022
Team ID	PNT2022TMID51598
Project Name	Project - A Gesture-based Tool for Sterile Browsing of Radiology Images
Maximum Marks	4 Marks

Brainstorm & Idea prioritization

Use this template to generate ideas and prioritize them. It includes a list of ideas and a prioritization matrix.

1. Before you collaborate

A list of ideas generated by the team. Each idea should be a single sentence. Use the template below to generate ideas.

Example: I want to create a tool that allows doctors to browse radiology images without using a mouse.

2. Problem statement

What problem are you trying to solve? What is the current state of the world? What is the problem you are trying to solve?

Example: Doctors need a way to browse radiology images without using a mouse. This is a problem because it is difficult to use a mouse in a sterile environment.

3. Brainstorm

Brainstorm ideas for solving the problem. Use the template below to generate ideas.

Example: I want to create a tool that allows doctors to browse radiology images without using a mouse.

4. Group ideas

Group ideas into categories. Use the template below to generate ideas.

Example: I want to create a tool that allows doctors to browse radiology images without using a mouse.

5. Prioritize

Prioritize ideas based on their impact and effort. Use the template below to generate ideas.

Example: I want to create a tool that allows doctors to browse radiology images without using a mouse.
